SHORTCART E-COMMERCE

Full-Stack Custom Web Application & UI Case Study

VERIFIED PORTFOLIO

Project Summary: A custom-engineered, modern e-commerce platform designed for digital storefronts. Features dynamic inventory tracking, real-time cart item adjustments, sleek product showcase layouts, and instant authentication.

Frontend Architecture

- Mobile-first responsive design optimized for all screen sizes.
- Dark-mode ecommerce interface with high contrast readability.
- Real-time subtotal, shipping, and estimated tax calculator.

Core Features

- Interactive shopping cart with live stock level indicators.
- Conversion-focused checkout workflow with clean summary breakdown.
- Integrated account management and authentication controls.

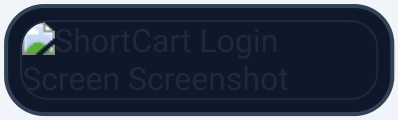

Technologies Used

React.js | Next.js | Node.js | Express | MongoDB | Tailwind CSS | REST API

USER AUTHENTICATION & LOGIC

Security Standards & Performance Highlights

SYSTEM ARCHITECTURE

Secure Authentication System

Implements enterprise-level user authentication featuring single sign-on (Google OAuth) alongside secure credential login with encrypted token management.

OAuth 2.0 | JWT | Bcrypt Hash | Route Protection

Key Performance Benchmarks

Optimized codebase structure ensuring fast page renders and minimal bounce rates.

100%	<1.0s	Clean	SEO
MOBILE READY	FAST LOAD	CODEBASE	OPTIMIZED

Development Standards

- **Component Modularization:** Highly reusable UI elements.
- **State Synchronization:** Seamless dynamic updates between product listing and cart.
- **API Security:** Input validation and CORS configured for enterprise protection.
